DETAILED ACTION

Allowable Subject Matter

Claims 12-18 and 36-52 are allowed.

The following is an examiner's statement of reasons for allowance: an apparatus for producing nitride films including: a pair of corona-discharge electrodes, a nitrogen delivery path leading to a nozzle at which a corona discharge is produced, and a device for locating a substrate, wherein *the substrate is located at a location sufficiently distant from the corona-discharge producing electrodes such that essentially the only activated nitrogen impingent on the substrate is $N_2A^3\Sigma_u^+$, and providing a transient time of nitrogen traveling toward the substrate exceeding the lifetime of activated nitrogen in states other than a $N_2A^3\Sigma_u^+$ such that the other states are effectively filtered out.*

Neither of the prior art of the record teaches or suggests a mechanism for filtering out all activated nitrogen species except $N_2A^3\Sigma_u^+$ produced in a corona discharge for forming nitride film on a substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Parviz Hassanzadeh whose telephone number is (571)272-1435. The examiner can normally be reached on Tuesday-Friday.
